

EXPRESS TECHNOLOGY ACQUIRES AMBRY INTERNATIONAL

March 28, 2017

DALLAS, TX - Express Technology, a Woman-Owned global leader in IT service parts fulfillment, announced today its acquisition of Ambry International, a keystone OEM spares supplier. This merger gives to Ambry's extensive client base the advantage of efficiencies inherent to Express Technology's next-generation information and relationship management infrastructure, while substantially expanding Express Technology's scope of service and market access.

Ambry International, established in 1991, has relied on Express Technology for more than two decades as a trusted source for rapid-deployment IT service parts.

Ambry's clients are encouraged to migrate to Express Technology at this time. Ambry.com will continue its normal operation through the end of business on 4/30/2017, with orders and quotes processed by Express Technology. On 5/1/2017 the Ambry.com site will close and Express Technology will handle all orders directly.

"Express Technology is at the vanguard of our industry and this merger represents a natural evolution of the business relationship," said Ambry International CEO George Lee. "Their personnel share Ambry's client-centric, quality-oriented philosophy and their processes are streamlined and reliable. We're confident that this step will be of immediate and significant benefit to our valued customers and partners."

"We're committed to a future of efficiency, agility, and delivery of unparalleled value to the client," notes Helen Nadolski, President of Express Technology. "Ambry's priorities align with our own. After many years fulfilling orders as an Ambry preferred supplier, we look forward with confidence to directly serving Ambry's base now and in the years to come."
